DETAILED ACTION

Election/Restrictions

Applicant's election of Invention III (claims 40-62) in Paper No. 10 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election **without traverse** (MPEP § 818.03(a)). It is noted that claims 1-39 directed to Inventions I and II have been canceled by the applicant (see Applicant's amendment filed on November 3, 2003, paper no. 10).

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the embodiment wherein the first arm is adjustable in length, as per claim 41, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Applicant is required to submit a proposed drawing correction in response to this Office Action. Any proposal by the applicant for amendment of the drawings to cure defects must consist of two parts:

- a) A separate letter to the Draftsman in accordance with MPEP § 608.02(r); and
- b) A print or pen-and-ink sketch showing changes in red ink in accordance with MPEP § 608.02(v).

IMPORTANT NOTE: The filing of new formal drawings to correct the noted defect may be deferred until the application is allowed by the examiner, but the print or pen-and-ink sketch with proposed corrections shown in red ink is required in response to this Office Action, and may not be deferred.

Specification

The abstract of the disclosure is objected to because it contains "means". Correction is required. See MPEP § 608.01(b).

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter or any new and useful improvement thereof, may obtain a patent therefore, subject to the conditions and requirements of this title.

Claims 40-62 are rejected under 35 U.S.C. 101 because they are drawn to non-statutory subject matter. In claim 40, line 4, applicant positively recites part of a human, i.e. "a first arm extending generally parallel to the longitudinal axis of the femur". Also, claim 47, lines 1 and 2, recite part of a human, i.e. "said second arm is coupled to a proximal end of the femur". Thus claims 40-62 include a human within their scope and are non-statutory.

A claim directed to or including within its scope a human is not considered to be patentable subject matter under 35 U.S.C. 101. The grant of a limited, but exclusive property

Art Unit: 3732

right in a human being is prohibited by the Constitution. In re Wakefield, 422 F.2d 897, 164 USPQ 636 (CCPA 1970).

It is noted that applicant is advised to change in claim 40 the word "extending" to -- extendable -- and in claim 47, the word "coupled" to -- capable of being coupled -- in order to overcome this 101 rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 47-50 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 47, line 3, "the proximal end surface of the femoral component" lacks a prior antecedent.

In claim 48, line 2, "the angular position" lacks a prior antecedent.

In claim 49, line 3, "the proximal end of the femoral component" lacks a prior antecedent.

Allowable Subject Matter

Claims 40-62 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 101 and 112, second paragraph, set forth in this Office action.
